Backpacking Light Editor, Aubrin Heinrichs, swiping a dripping nose with the Snot Spot mitten model.

Snot Spots are a very simple idea. They are reusable, washable, microfleece additions to gloves or mittens that provide a soft place to wipe your runny nose....

Of course, simple ideas don't always work in practice - but this one does. I took along a Snot Spot on a three-day snowshoe trip in Yellowstone National Park. My nose usually feels sore after a few days of winter backpacking from the constant wiping - with a tissue if I have one handy and don't mind de-gloving to grab it or, more typically, with the back of a glove or mitten - but the Snot Spot saved my nose. I had a mitten style Snot Spot along but ended up wearing gloves or nothing on my hands in warmer than expected conditions. I wore the thumb ring over a finger and it worked just fine with mid-weight gloves or barehanded....
